

# DigiDoc

for  
medical supply

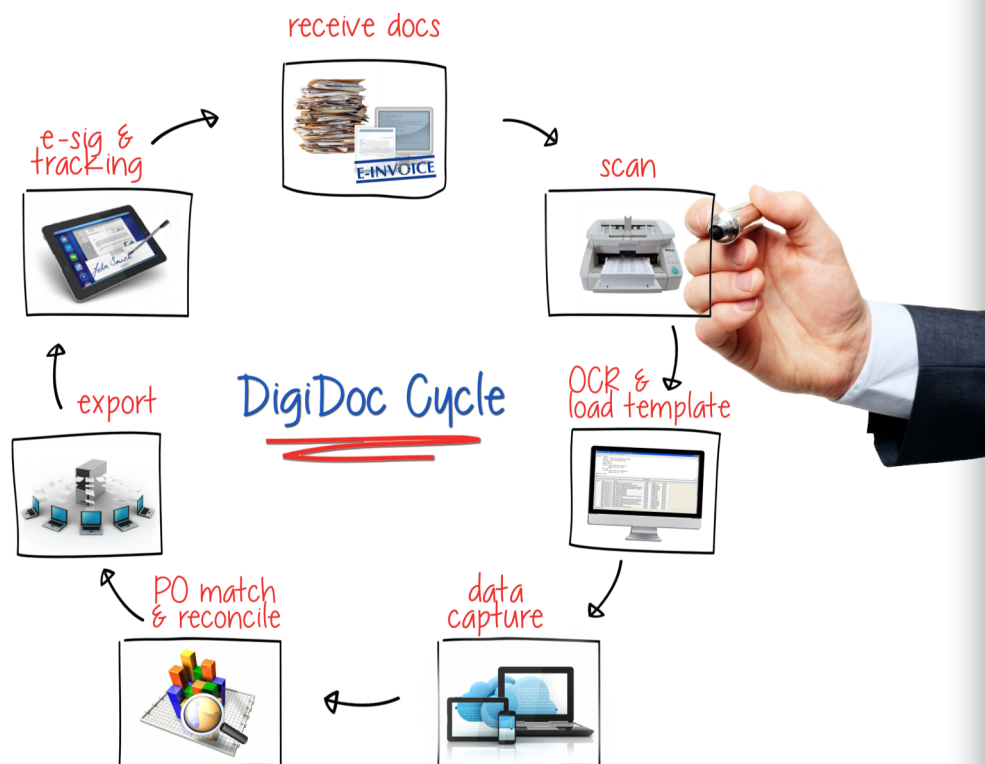

## CHALLENGE

Managing the flow of products within the healthcare industry can be a daunting task. In addition, hospital sourcing management teams are feeling increased pressure to control costs while increasing quality and supply accuracy.

## SOLUTION

DigiDoc from Broad Data Solutions is a cloud-based Medical Supplies Solution that transforms manual, complex processes into an automated, efficient system.

Designed for medical supply receiving areas, DigiDoc captures vendor packing slips, scans them, applies OCR, matches to POs, reconciles materials received vs. ordered, then sends messages to the client's ERP for database updates and e-sig hospital materials' tracking – all in just few quick keystrokes.

# DigiDoc

## BENEFITS

### Automate Workflow

Free up resources and give your employees the power to concentrate on what matters most—insuring departments receive accurate, timely data and reports.

### Increase Accuracy

Reduce errors and get the information you need to make smarter decisions, faster.

### Centralize Data

Enable employees to access information from multiple locations with ease 24/7 from any computer or mobile device...no more lost or mis-placed paperwork.

### Eliminate Manual Processes

Create electronic efficiencies—no more sorting through files and stacks of slips.

### Streamline Delivery Cycle

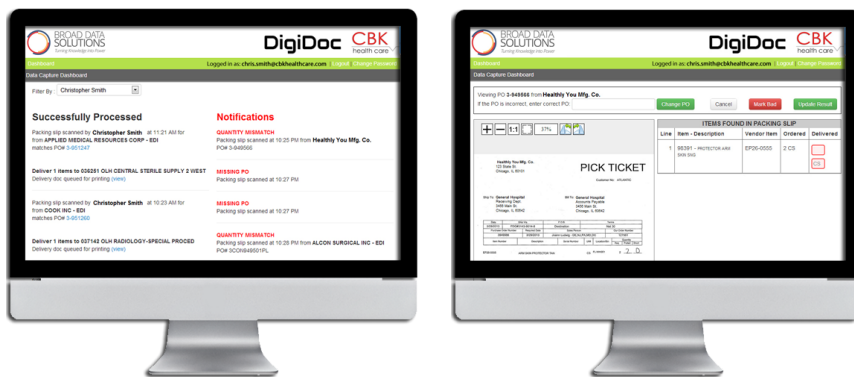

Provide visibility into the journey of product—making sure the correct items are delivered to the correct department within the hospital on time.

### Manage Regulatory & Compliance Standards

Maintain the integrity of your data without compromising confidential information.

### Enhanced Vendor Library

Gain a competitive advantage with reduced development and startup fees, quicker solution implementation and a solid pre-coded set of vendor documents.

View the DigiDoc Cycle through a user-friendly, dedicated dashboard.

Contact us today and see for yourself why organizations are making the switch to DigiDoc. With low upfront costs and rapid deployment options, you'll be on your way to becoming an accurate, efficient team in no time.

## HELPING YOU WORK SMARTER

For the past 26 years, BDS has been empowering businesses to work smarter through our custom, can-do approach to Enterprise Information Management. We provide cost-effective intelligent data capture, database enhancement and data improvement to companies in the healthcare, education and government sectors.

Our trusted, caring team of data experts partner with clients to deeply understand their unique needs, doing whatever it takes to solve workflow problems and visibly improve operations. By helping businesses fully leverage vital information, we enable them to save time, maximize profits and focus on what they do best.
